Phillips 66 and Center for America Partner to Help National Guard Members Find Jobs

Phillips 66 (NYSE:PSX) is partnering with the Center for America to be the lead corporate sponsor of **American Jobs for America's Heroes** (AJAH), a national campaign aimed at connecting unemployed National Guard members with employers.

"At Phillips 66, we know that the National Guard offers outstanding experience, skills and training, and its members and veterans make valuable employees," said **Larry Ziemba**, (right), executive vice president, Refining, Projects and Procurement for Phillips 66 and chair of the AJAH campaign leadership council. "We encourage other companies to step up recruitment of National Guard members and participate in the Center for America's efforts to connect these heroes with employers."

"Phillips 66 has more than a century of leadership in energy manufacturing and American job creation that now brings dynamic direction and support to the American Jobs for America's Heroes program," said Steve Nowlan, CFA president. "Phillips 66 has engaged immediately and with enthusiasm for the practical purpose of this program – employing National Guard members, spouses and veterans. We're very grateful for Phillips 66's vital support."

"National Guard Members and their families live in our communities and share in the struggles with today's economy. They are also highly trained volunteers ready at a moment's notice to defend America and take the lead in rescue and disaster relief, as we've seen during Hurricane Sandy," said Nowlan. "Employers across America seeking trained and committed skilled workers now have the cost-free, comprehensive and ongoing resources available to connect with available National Guard Members, their spouses and veterans seeking employment."

About Phillips 66

Headquartered in Houston, Phillips 66 manufactures energy products used in everyday life. The company refines and markets petroleum products such as gasoline, diesel, jet fuel and lubricants; gathers and processes natural gas for powering businesses, heating homes, cooking and electricity; and manufactures petrochemicals, polymers and plastics found in cars, electronics, and other everyday goods.

Phillips 66 has approximately 14,000 employees in America and around the world.
